

Hassan Al-Rawi

Principal Engineer

Houston, TX · (814) 431-1373 · hassan@iffproductions.com · [linkedin.com/in/hassan-al-rawi-19112a87](https://www.linkedin.com/in/hassan-al-rawi-19112a87)

SUMMARY

Principal Engineer with 10+ years building and shipping production software across logistics, oil & gas, fintech, and insurance. I lead cross-functional teams of 4–6 engineers, architect real-time data-streaming systems, and turn complex business workflows into scalable products. Named inventor on a patent that drove **\$1M+ in first-year revenue**, shipped the official **NCAA Elite 8 iOS app**, and built a home-services SaaS platform now serving **500+ customers**.

CORE COMPETENCIES

Technical: Distributed Systems · Real-Time Data Streaming · Cloud Architecture (AWS/Azure/GCP) · API Design (REST/gRPC/GraphQL) · System Architecture · CI/CD & Infrastructure-as-Code

Leadership: Team Leadership & Mentorship · Cross-Functional Collaboration · Product & Project Management · Code & Design Reviews · Stakeholder Communication

PROFESSIONAL EXPERIENCE

Bradford Airport Logistics — Houston, TX

Principal Engineer · Sep 2025 – Present

- Lead a team modernizing legacy business applications, migrating from ColdFusion to a React, React Native, and NestJS stack on AWS provisioned with Terraform.
- Built a multi-agent AI pipeline (powered by Claude) that automates the path from Jira ticket to code generation, review, and deployment — accelerating delivery and standardizing code quality across the team.
- Established end-to-end observability with Sentry and Grafana, improving incident visibility and time-to-resolution.
- Own GitOps and DevOps operations, standardizing CI/CD and infrastructure-as-code practices across engineering.

EOG Resources — Houston, TX

Lead Full Stack Developer · Sep 2024 – Aug 2025

- Led a cross-functional team of six delivering oil & gas data products, owning workflows, processes, and execution end to end.
- Architected multiple products and established enterprise standards for process-building services adopted across teams.
- Designed and implemented real-time data streaming and visualization solutions for oil & gas operations.
- Built client-facing applications with React, Redux, Redux Saga, Material UI, WebSockets, GraphQL, TypeScript, and OpenAPI generators.

Upstart — Houston, TX (Remote)

Senior Full Stack Developer · Jul 2022 – Mar 2024

- Mentored a cross-functional team of six building Upstart's mortgage products.
- Designed, built, and maintained backend services communicating over gRPC, Kafka, and REST, deployed to AWS and OpenShift via infrastructure-as-code.
- Prototyped enterprise solutions to simplify complex business workflows using orchestration engines (Camunda, Temporal).
- Developed an encryption library for Python and Kotlin backed by AWS KMS, plus AWS Lambda functions to automate KMS key rotation.
- Built client-facing apps with Next.js, React, TypeScript, Material UI, and RESTful APIs.

Progressive Insurance — Cleveland, OH

Full Stack Developer Consultant · Jan 2019 – Jul 2022

- Partnered with executive leadership to deliver a homeowner-services SaaS platform connecting customers with affordable repair professionals — **now serving 500+ customers at \$2.5K average spend**.
- Named inventor on a patent for the platform, contributing to **\$1M+ in first-year revenue**.
- Managed and mentored a 4-developer cross-functional team across multiple consumer-facing SaaS products.
- Designed and deployed public REST endpoints letting end-users manage multiple policies through the Progressive web app, improving customer-portal UX.
- Led design and code reviews, driving performance improvements and process standards.

Progressive Insurance — Cleveland, OH

IT Apps Developer Lead · Oct 2017 – Jan 2019

- Led a team building new consumer features for progressive.com, serving millions of customers, and planned the product roadmap.
- Designed and implemented features using Angular, ASP.NET, C#, Node.js, Go, Kubernetes, AWS, Splunk, and Azure DevOps.
- Mentored developers on career growth and resolved complex production issues across teams and time zones.

Progressive Insurance — Cleveland, OH

IT Apps Developer, Senior · Jan 2015 – Oct 2017

- Modernized the business engine and rules for Progressive’s commercial products using XML, C#, and ASP.NET; upgraded internal applications for IE11 compatibility.

Gannon University — Erie, PA

iOS Application Developer · Jan 2014 – Jan 2015

- Gathered requirements, designed, built, and shipped the official **NCAA Elite 8 iOS app** to the Apple App Store.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, Go, Python, Java, Kotlin, SQL

Frontend: React, React Native, Redux, Angular, Next.js, Material UI, HTML/CSS

Backend: Node.js, NestJS, ASP.NET, FastAPI, Spring Boot, REST, gRPC, GraphQL

Data & Streaming: Kafka, RabbitMQ, Snowflake, MemSQL, Redis, SQL/NoSQL

Cloud & DevOps: AWS, Azure, GCP, Docker, Terraform, OpenShift, Kubernetes, GitOps, CI/CD

Observability: Sentry, Grafana, DataDog, Splunk

AI: Claude, Multi-Agent Workflows, AI-Assisted Code Generation & Review

EDUCATION

Gannon University — Erie, PA — M.S., Computer Software Engineering · May 2014

Applied Sciences University — Amman, Jordan — B.S., Civil Engineering · May 2009
